Summary

Promise is a highly capable Front End Developer offering programming, system monitoring and maintenance prowess. Constantly automated build, deployment and integration processes, increasing team productivity 90%.

Also a talented web development professional highly experienced with wide range of programming languages and design tools. Skilled at producing clean, secure code based on individual client's needs. Focused on delighting customers with innovative, user-friendly designs.

Skilled team player with strong background in work and remote environments. I work well independently to handle assignments and always ready to go beyond basics assignments. I am a quick learner with good computer abilities.

I am a hardworking and reliable programmer focused on going above and beyond to support team and serve customers. Trained in, HTML, CSS, JavaScript, React Js, WordPress an other programming languages and offering top-notch web/frontend development abilities. I am motivated to continue to learn and grow as a web programmer/ software engineer professional.

I am focused on completing work quickly to consistently exceed targets and I am dedicated to business success.

Experience

React Weather-App project

SheCodes

Dec 2022 - Jan 2023 (2 months)

During this workshop, I sharpened my skill in learning React and built a Weather-App using ReactJs. Readily made use of reusable components and integrated the app with a 90% accurate weather API which made it it easy to generate high and active performance for the app.

The app is 100% functional, responsive and professional

Freelance Web Developer, Remote.

Upwork

Jun 2022 - Present (9 months)

A professional front-end/web developer with more than 5 years of experience and a graphic designer with over 3years of experience.

As a freelancer, I help create, build and maintain websites and also meeting the desired need of my clients while keeping my codes clean and highly reusable for professional purposes.

Easily develop responsive designs both for desktops and mobile devices, help manage websites and also update new ideas and development for each brand to their websites so its users can have immediate access to the changes made in the website.

So far I have been able to

- . Create animated profile UI card designs which includes a user interface designs with animation and transitions for several clients.
- . Responsive customized websites for my clients.
- . Business Websites (Responsive HTML landing page for desktop, tablet and mobile view) according to their requirements.
- . Email Templates that reflects brands and customize messages with layouts that are specific to my client's organization.
- . Responsive opt-in form (form registration page) for brands.
